Capstone Mentor Interview
Dr. Danial Brennen

1. What influenced you to become a chiropractor?
 - a. I had wanted to be in the medical field for a long time. The chiropractic field interested me at the time, so I decided to pursue it.
2. What type of practice do you work in?
 - a. I work in a pain management health office. We all work together for physical therapy and chiropractic techniques to help a patient feel better at the end of the day.
3. How do you handle issues with patients?
 - a. Issues with patients are bound to come about. Patients are coming to me because they are in pain, so when issues come about I just like to think that they are acting that way because of the health state that they are in. I just keep a cool head and move along.
4. Do you use any marketing strategies to attract new patients or keep old ones?
 - a. I have moved to a few different offices in a few states, so keeping patients is a different story. Wherever I go, there will be work. I just maintain a good work ethic and everything works out.
5. Do you enjoy your work?
 - a. Yes, although, there are times where I wish I was doing something else, but it comes in waves. I still go to work every day, so I still enjoy it.

6. Do you offer any other form of care for your patients?
 - a. I guess you could say I provide some emotional support to patients. A large part of chiropractic care is releasing, both physical and emotional. The patients always feel a sense of relief after.
7. How would you say that you have influenced your patients?
 - a. I feel like I have influenced my patients to take good care of themselves and never give up on their condition.
8. Is chiropractic care connected with any other profession in the medical field.
 - a. Chiropractic care is very closely tied with Radiology. In order to help patients, we need to be able to see inside too.
9. Do you have any comments on how your profession has impacted the world around you?
 - a. My profession has mainly helped people feel better in their day to day lives. Without it, people would be aching and in pain.
